WORK EXPERIENCE

GLOVO

Sept 2017 - current
Barcelona

LEAD FRONTEND ENGINEER

In charge of having an up-to-date ecosystem that has some consistency and follows good code practices in the web team

Cool things done:

- Lead the Frontend stack of Glovo (Vue.js, Nuxt.js, Node, GraphQL)
- Lead the Growth / B2B team
- Implement & A/B Test multiple RPO improvements
- Implement Glovo Prime
- Implement Glovo Member Get Member program
- Implement Glovo Business

GLOVO

Sept 2015 - Sept 2017
Barcelona

FRONTEND ENGINEER

Lead the migration of all the frontend stack of Glovo to Vue.js

- Develop the Customer v2 PWA allowing customers to place orders
- Develop the Partners PWA to allow partners to handle their orders and sync their schedules
- Improve the Customer Android app (RXJava, Events buses, Retrofit, Butterknife)

OLIVA CARD

Feb 2015 - Sept 2015
Barcelona

SOFTWARE ENGINEER

A small startup where as a one-man-team I developed the Android app and website of Oliva Card, a loyalty solution for small merchants. Learnt a lot implementing QRs, NFC and different technologies in Android

EVERIS

2013 - 2015
Barcelona

SOLUTIONS ANALYST

First job out of the university: software consultancy. Learnt Java, Databases, Spring, Hibernate and even Adobe Flex!

EDUCATION

2006 - 2013

UNIVERSIDAD POLITÉCNICA de BARCELONA

Telecommunications Engineering - Telematics speciality

1992- 2006

LYCÉE FRANÇAIS de BARCELONE

Elementary & High School - Barcelona

PROFILE

Born in 1988, Boston (USA) and living in Barcelona since I was a child. Telecommunications Engineer

My adventure started with Android, but nowadays I work as a Frontend Tech Lead. Open source and exciting projects are a must in my life.

SKILLS

- Javascript: Working with ES6 & ES7 on a daily basis. Touching all the frameworks (Angular, React) and in love with Vue (making-a-library level). Node.js for the backend. Battled with Webpack.
- Android: Android, Java & Kotlin.
- FrontEnd: CSS in a smart way, Flexbox, GridLayout and preprocessors.

OFF-WORK

I don't stop doing things.

At a tech level, right now you'll see me coding and learning:

- Blockchain & Smart Contracts
- Bots/AI/Machine Learning
- Open source projects

But a better thing than learning is to be able to teach and communicate your knowledge. That is why you'll see me:

- In a bunch of Meetups
- Going to conferences
- Writing as much as I can in blogs/websites
- I even gave a TEDx talk!

Also, my love to Android comes from my first big project. In 2009, I co-funded one of the biggest Android related websites in Spain: El Androide Libre. We grew it from nothing to more than 200k visitors/day. Ask me about it and I'll talk for hours!
